#### POLICY FOR BAN ON USE OF PLASTICS

Worldwide plastic production continues to create havoc on our environment. Of all the plastic ever made, about 60% has ended up in landfills or the environment. To protect our environment, we must greatly reduce the amount of plastic use. The world needs commitments from all levels, from individuals to leaders to businesses. We as a philanthropic institution should join hands in the protection and conservation of nature. Thus, small changes in us can bring about wholesome living conditions for our future generation.

JSSLC strives to initiate the movement towards a plastic-free future through the following:

1. To create awareness among the students and staff through various activities.
2. To organize programs on the impact of plastic use on the environment.
3. To obligate the use of jute/cloth/paper bags as an alternative.
4. To substitute the use of plastic water bottles.
5. To avoid use of bottled water.
6. To use paper folders in place of plastics for assignments.
